

QWidget

dctoolbox

DatacontrolToolboxWidget

```
classDiagram
    class QWidget
    class DatacontrolToolboxWidget
    class dctoolbox
    QWidget <|-- DatacontrolToolboxWidget
    QWidget <|-- dctoolbox
```

The diagram illustrates a class hierarchy. At the top level, there are two classes: QWidget and dctoolbox. Below them, a single class named DatacontrolToolboxWidget is shown. A horizontal line connects the two top-level classes, with a vertical line extending downwards from its center to the top of the DatacontrolToolboxWidget box. From this vertical line, two arrows point upwards: one to the bottom of the QWidget box and another to the bottom of the dctoolbox box, indicating that DatacontrolToolboxWidget inherits from both QWidget and dctoolbox.
