

InformationInterface

```
classDiagram
    class InformationInterface
    class InfoMeshObjectPlugin
    class InfoSkeletonObjectPlugin
    InformationInterface <|.. InfoMeshObjectPlugin
    InformationInterface <|.. InfoSkeletonObjectPlugin
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'InformationInterface'. Below it are two boxes: 'InfoMeshObjectPlugin' on the left and 'InfoSkeletonObjectPlugin' on the right. A horizontal dotted line connects the two bottom boxes, with a solid vertical arrow pointing upwards from the center of this line to the bottom edge of the 'InformationInterface' box. This indicates that both 'InfoMeshObjectPlugin' and 'InfoSkeletonObjectPlugin' inherit from or implement 'InformationInterface'.
